WORK EXPERIENCE

Tanger Med Port

Authority

August 2025 -

December 2025

(4 months)

Full-Stack Developer intern

- Development of modules for a general services application, including request cycle management and advanced statistics (Chart.js).
- Design of backend models and services with Node.js, and React integration following best practices.
- Migration of the application from MUI v4 to MUI v5, package updates, and conflict resolution.

VidaTrans

June 2022 - July

2022 (1 month)

Full-Stack Developer intern

- Design and deployment of a WordPress website tailored to the company's needs.
- Development of custom features to simplify content management.
- Improvement of performance, security, and user experience.

EDUCATION

1337 - 42 network

2022 - Present

Project-Based Software Engineering Training

Trained in 42 School's peer-to-peer, project-based environment. Proficient in C/C++, algorithms, and system programming, with a focus on problem-solving, collaboration, and continuous learning.

Ofppt solicode

2021 - 2022

Project-Based Full-Stack Development Training

Trained in fullstack development through a peer-to-peer bootcamp. Proficient in HTML, CSS, JS, PHP, MySQL, and React, with experience building dynamic, collaborative web applications.

Université

Abdelmalek Essaâdi

2019 - 2021

Faculté des Sciences Économiques et Sociales

Gained foundational knowledge in economics, social sciences, and accounting, fostering analytical and problem-solving skills.

PROJECTS

Docker, HTML, CSS,
JavaScript,
WebSockets, Web
Components, JWT,
Django, Redis

Ft_transcendence

- Collaborated in a team to create a modular multiplayer Pong game.
- Developed frontend game logic, tournament features, and matchmaking interface.
- Implemented a state-based deterministic AI that predicts ball trajectories.
- Designed UI components using Web Components API for modularity.

Docker, React,
Zustand, CSS,
Nodejs, Express.js,
MongoDB

Scribbly

- Developed a note-taking app with user authentication, organizational features, and management tools.
- Containerized the frontend and backend using Docker for simplified deployment and scalability.

Typescript, React,
TailwindCSS, Framer
Motion, Html Canvas

Portfolio

- Developed a personal portfolio using typescript and react paired with tailwindCSS to create a visually appealing website.
- Implemented code splitting and performance hooks to improve the speed and efficiency of the website.

FRONTEND

HTML, CSS, Javascript,
Typescript, React, Zustand,
TailwindCSS, MUI

BACKEND

Nodejs, ExpressJs,
PostgreSQL, Zod MongoDB,
TypeORM, Php, Mysql

CORE SKILLS

Communication,
Collaboration, Problem-
Solving, Unit Testing,
Debugging.

LANGUAGES

Arabic
English
French

TECHNOLOGIES & TOOLS

Linux, Bash, Docker, Nginx,
Vitest, Git, Figma
